

Forest Electric

An EMCOR Company

**High Performance Today,
Prepared for Tomorrow.**

Forest Electric builds, powers, and services sophisticated electrical and datacom systems for today's high performing facilities.

What can we do for you?

High-performance solutions for today's most demanding requirements

Forest Electric, An EMCOR Company, is the Region's leading provider of single-source mission-critical and other electrical contracting solutions. Whether it's construction at the World Financial Center or cable replacement at the Meadowlands complex, major clients trust Forest. These clients know that, regardless of their project's size or complexity, Forest can deliver the sophisticated electrical and data communications services needed for reliable, energy-efficient operation. That's why 90 percent of our projects come from repeat business.

Expertise you can depend on...every time.

Forest's expert professionals provide the dependability you need to succeed in today's tough competitive environment. Highly experienced, skilled and reliable, they are dedicated to completing every project quickly, efficiently and thoroughly. Furthermore, we continuously train our people on today's newest technologies, applications and procedures to ensure outstanding service and value everytime. When you work with Forest, you can be sure you always have the right people when and where you need them.

Innovative value engineering

Forest is one of the area's few electrical contractors with fully staffed engineering capabilities. Using their advanced computer-aided design and installation management expertise, our engineers work with you and your team to develop innovative value-engineering options and select the right system for optimum operation. They can also help you identify potential trade, system and other installation conflicts, and resolve them before they become project disruptions. The result is peak system performance and cost-effective, on-time system installation.

Our services:

- Interior Construction
- Infrastructure Design Build
- Tenant Buildouts
- Mission Critical Systems
- Datacom Total Solutions
- Energy Systems/Generation
- Design/Build
- Electrical Services & Distribution Upgrades
- D.C. Power
- Maintenance
- New Construction
- Full Plant Maintenance

Markets served:

Commercial

- Building Infrastructure
- Meet Me Rooms
- Office Buildings/Real Estate

Residential/Condo Conversions

Education

Financial Services

Industrial

Institutional

Power Generation

- Back-up Systems
- Cogen
- Emergency Power

Technology

- Computer Rooms
- Data Centers
- Data Hotels
- Telecommunication

Expert solutions for technology challenges

Forest's leading-edge technology solutions include:

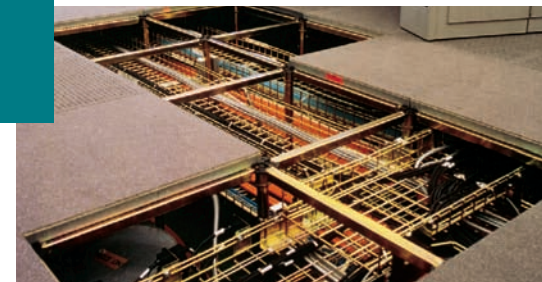

→ **Forest Datacom Services** – provides communications planning, engineering, purchasing and installation for everything from basic voice systems to leading-edge networks in mission-critical facilities, including data centers, pharmaceutical laboratories, manufacturing plants and more.

→ **Forest Technology** – helps established and emerging communications companies design and build advanced communications networks, and connect them to local and long distance carriers. Once a network is operating, we ensure continuous value through timely upgrades and expert maintenance.

→ **Forest Power Solutions** – delivers turnkey design/build co-gen, emergency generation, and other solutions that give you reliable power, regardless of electrical grid conditions. These solutions may also let you take advantage of local utility load reduction and other cost-saving programs.

Around-the-clock investment protection

To achieve maximum return on your electrical system investment, you need to keep it serviced for continuously smooth, efficient operation. That's why Forest provides a complete staff of technicians skilled in maintaining electrical, data communications and other vital systems. **On call 24/7/365**, they provide both the ongoing preventive maintenance and rapid emergency service you need for consistently optimum performance and long-term value.

What can we do for you?

From value engineering through installation and maintenance, Forest Electric's diverse experience, in-depth expertise and dependable service add up to high-quality systems, maximum energy efficiency and reliable, high-performance operation.

Safety that beats the national average

Like all EMCOR companies, Forest Electric is passionate about safety and quality. EMCOR's ZERO Accident Program (ZAP) has helped us achieve safety performance that's 5-to-10 times better than the national average. Furthermore, since 2002, EMCOR companies have reduced their total recordable incident rate (TRIR) by 46 percent, leading CNA Insurance Company to recognize us for our safety program design and high-level safety performance. It all adds up to safer jobsites for people and more efficiently delivered projects for you.
